

**The International
Coconut Genetic Resources Network**

**List of the 855 coconut populations
registered in the Coconut Genetic Resources
Database as of April 2012
*(ranked by names of cultivars and populations)***

Dr R. Bourdeix
Cogent Coordinator
CIRAD BIOS - Umr CEFE – Bioversity HFR

**List of the 855 coconut populations registered
in the Coconut Genetic Resources Database as of April 2012
(ranked by names of cultivars and populations)**

The International Coconut Genetic Resources Network (COGENT) includes 39 country members. Up to now, only 23 countries have provided data on their genebanks (see table 1). The data was recently updated in the framework of the project “Upgrading international coconut genebanks and evaluating accessions” funded by the global Crop Diversity Trust and led by Bioversity International.

The CGRD project was initiated in 1994. From January to April 2012, the data was updated for the following 6 countries: Brazil, Côte d’Ivoire, India, Indonesia, Sri Lanka and Malaysia. We also received the data from Ghana, Nigeria, Vanuatu and Papua New Guinea but the data was not sufficiently standardized to be incorporated directly in the database. So we wrote again to these countries to get more information before integrating their data.

In some cases, this table may not reflect today’s reality, as some of the countries did not update of the data during the last 10 years. Users must contact the specific data providing institute(s) directly, with any questions or comments regarding information stored in CGRD and for queries regarding the germplasm held in a specific institute(s). Users acknowledge that their access to and use of data does not entitle you to any copyright or other intellectual property right or other proprietary interest in the accession list or the Portal. Users are required to acknowledge the sources of the data accessed.

**Table 1. Codes for countries and institutions
of the 24 COGENT genebanks registered in CGRD Database**

	Codes	Countries and Institutions		Codes	Countries and Institutions
1	BARI	Bangladesh Bari	13	CICY	Mexico CICY Yucatan
2	SP	Bénin CRC Sémé Podji	14	PAKI	Pakistan Agric. Research Council
3	BRA	Brazil EMBRAPA	15	SRS	Papua New Guinea Stewart Res. Centre
4	CHIN	China Wenchang Res. Inst.	16	PHL	Philippines Coconut Authority
5	SMD	Cote d'Ivoire CNRA	17	WS	Samoa Ministry of Agriculture
6	TCC	Fiji Taveuni Coconut Centre	18	YSI	Solomon Islands Yandina
7	OPRI	Ghana OPRI	19	CRI	Sri Lanka Coconut Res. Inst.
8	IND	India CPCRI	20	NCDP	Tanzania Coconut Dev. Prog.
9	IPRI	Indonesian Palm Research Institute	21	CHRC	Thailand Chumphon Hort. Res. Centre
10	CIB	Jamaica Coconut Industry Board	22	TON	Tonga Ministry of Agriculture
11	DOAS	Malaysia Depart. of Agric. Sabah	23	VT	Vanuatu Saraoutou Res. Centre
12	MHP	Malaysia MARDI Hilir Perak	24	DGEC	Vietnam Dong Go Exp. Centre

This list includes all the 855 populations registered in the database; anyway, 130 of these populations have a 0 value for the number of living palms, meaning that: they were lost or the genebank never provided the data about accession size.

As shown in Table 2, the list of populations was made more comprehensive by adding some criteria and analysis of the rarity of the germplasm and the quality of the data provided. This will help both users, to better understand germplasm conservation, and genebanks for improving the data available in the Coconut Genetic Resources Database.

Table 2. Caption of the list of the 855 coconut populations

	Population endangered, conserved by only one accession. Data must be updated and decision must be taken rapidly to regenerate it or to loss it.	607 populations are conserved in one genebank only, of which at least 255 were planted 25 years ago or later, and of which 39 have no recorded date of planting.
	Populations with a number of living palms announced as 0.	Some of these populations are lost, for other the number of living palms was not transmitted to the database.
	Populations with a number of living palms far under the standard (from 1 to 40 living palms).	
PAS	Average completion rate (%) of the descriptors of the passport section (in orange color when the completion rate is low as less than 40%)	Average completion rate is 58%. 154 populations among 855 have a completion rate of less than 40%.
CHAR	Average completion rate (%) of the descriptors for the field characterization (in light orange color when the completion rate is low as less than 10%)	Average completion rate is 31%. 285 populations among 855 have a completion rate of less than 10%.
